- Olympus Sashiko needles

How to handle threads

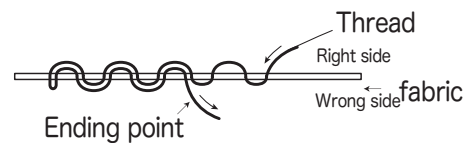

A #25 embroidery thread consists of 6 strands. Pull strands individually and sleeve them. Put 6 strands back together before stitching.

How to stitch

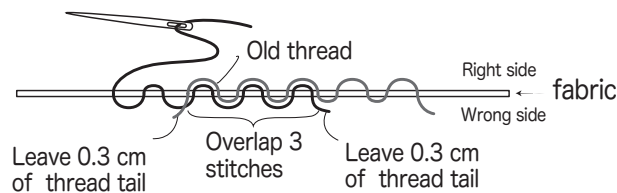

To begin stitching; insert the needle, from the wrong of the fabric, 3 stitches ahead of the starting point. Make 3 small stitches back to the starting point. Begin the regular stitches by covering the small stitches.

To end stitching; at the ending point, bring the needle to the wrong side of the fabric, make 3 stitches backward, being careful not to go over the regular stitches.

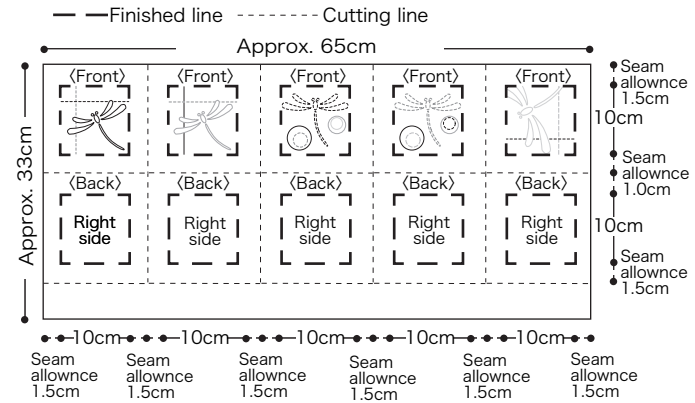

To change the thread; when changing the thread in the middle of stitching, use the methods to begin and end stitching, as shown in the below picture.

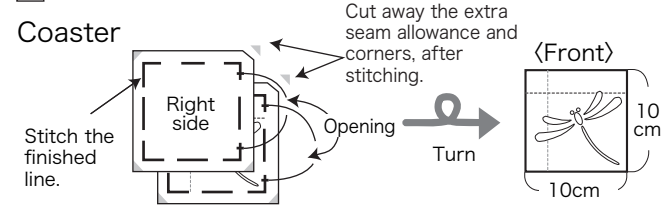

How to make

1 Cut fabric along with the cutting line.

2 Stitch the front and back pieces together.

- (1) Put the wrong side of the back piece and the right side of the front piece together, matching the finishes lines. Use your marking pins to avoid fabric to be scooped.
- (2) Stitch the finished lines except the opening. Use a backstitch at the beginning and the ending. Cut away the extra seam allowance, leaving 1.0 cm width of seam allowance.
- (3) Turn the seam allowance inside at the finished line with iron. Turn the coaster and stitch the opening, turning the seam allowance inside.

How to make flinges

- (1) Coaster: Take two pieces of thread (12 strands) and put them into the corner.
- (2) Draw: Make a knot shown in the picture. Draw one end of the thread.
- (3) Draw: Draw the other end.
- (4) Draw: The final result with a 1.5 cm tail.

3 Sashiko stitching

After finishing coasters, stitch with 6 strands of #25 embroidery threads. Pull the thread after every few stitches. This will prevent the twisting of thread. Be careful not to pull the thread too hard, 10 hem stitching the diagonal or circular designs, which could cause the cloth to stretch.

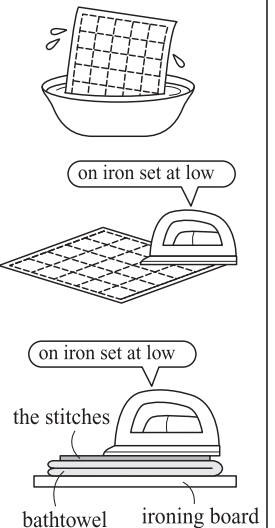

Washing instruction

(For finishing)
Be sure you have finished all the stitches, there is no loose thread or too tight stitches.

Rinse the fabric gently in the water. Dry in the shade, when the fabric is slightly wet, press on the back side with iron set at low.

(For washing)
Hand wash in the warm water using mild detergent. Do not use bleach. Rinse thoroughly. Dry in the shade.

In order not to push down the stitches, fold a bathtowel in half and place on the ironing board. Place the finished item and press on the back with iron set at low.

Caution!
This kit includes a needle(needles).
